CAREER OBJECTIVE:

Working in the IT industry for the past 2 years and now aiming to work in a dynamic environment, to get the best out of my skills which can be productive for the company as well as me. Looking for a position of Front-End Developer in the organization. Want to work on live projects and create a positive impact on the company's output.

SUMMARY:

- Front-End Developer with a proven experience in building and maintaining responsive websites in the recruiting industry. Proficient in HTML, CSS, JavaScript, VueJS and ReactJS. Knowledge on working with Git and GitHub.
- Identified & implemented dynamic web solutions in accordance to the company standards and follows best practices for maintainability.
- Bachelor of Technology (B.Tech) in "**Electronics & Tele-Communication**" from C.V. Raman College of Engineering (2015-2019) with CGPA of **6.62**

SKILLS:

- Hands on coding experience in **ReactJS, VueJS & React Native**.
- Holds good knowledge grip in **HTML, CSS & JavaScript**.
- Follows the industry standard "**BEM Methodology**" for CSS.
- Bootstrap & DOM model.
- Knowledge in **jQuery & NPM** initialization.
- **Node.js, Express.js** and many other node modules.
- Familiar in working with **Git & GitHub**.
- Basic knowledge on **SQL & NoSQL (MongoDB)** database operation.
- Hands on coding in **Python & Embedded C**.
