2014-15	INDIRA GANDHI VIDYALAYA AND JUNIOR COLLEGE,DIWAD SSC PERCENTAGE 89.20%

PROJECTS

- Online Tiffin Management System- (React, MySQL, Spring Boot)

The web based Tiffin delivery and management system project is an attempt to simulate the basic concept of tiffin delivery and management system chain. The system is mainly designed through the perspective of tiffin provider.

The customer has to signup and check the menu and order the tiffin as per requirement for required period of the time. The system allows the admin to post the tiffin details, manage orders and delivery staff.

- Automatic Power Factor Monitoring and Correction-

If we consider varying loads manual switching will be difficult to obtain high power factor. To overcome this APFC unit is implemented. In this project we are implementing a simple model using microcontroller for switching/triggering a required capacitors to bring a power factor to near to unity.
