between Sep2021-Jan2022, I worked on the company website's admin panel. My task was to handle backend and build APIs. I used MongoDB for this project.
- 2022 SadguruSoft
Currently Working as MEAN stack developer

Languages

- English fluent
- German A2 level
- Hindi Native speaker
- Gujarati Mother tongue

Personal Interests

I like to spend time with my family and friends. I love playing Chess and Football. I play FPL regularly. I like to watch whodunit movies.

Other Information

Review

I am a full-time MEAN stack developer and a dedicated learner of web development. After studying Computer Science in Germany, I came back to India during the lockdown and started working in a small company as a Node js developer, where I worked closely with an exceptional team of developers and learned javascript intensively during both my professional and spare time. Later on, I moved to another company to further my knowledge. There I got trained for Angular and Typescript. Currently, I'm getting my hands dirty with ReactJs in my free time.
