

EXPERIENCE SUMMARY:

- 7 years 3 months of Experience with .Net technologies, Angular and React.
- Having 2 Years of working experience with asp.net core web application.
- Having 3 Years of working experience with asp.net mvc and asp.net web api
- Having 2 Years of working experience with **Angular 8**.
- Having 11 months of working experience with **React Native** and **ReactJS**.
- Having 4.5 years of experience with C#.Net and 2 years of experience with LINQ, LINQ to Lambda
- Having 2.6 years of experience with ASP.NET, VB.Net programming and Web services.
- Experience with data access using **ADO.Net, Entity Framework**.
- Good perception of **Object-Oriented Programming (OOPs)** concepts.
- Involved in Various development phases like Design, Developing, and Unit Testing.
- Having Strong knowledge in **HTML, XML, XSLT AJAX, jQuery, JavaScript, Bootstrap** and **CSS3**.
- Hand of experience of using Third-party controls- **Telerik Controls (Kendo)**.
- Having Strong exposure on **.NET Framework** with using **Visual Studio**.
- Hands of experience of using **N-Tier** and Good understanding on MVC Architectural pattern.
- Having good experience Database design and development experience with **My Sql, Microsoft SQL Server**.
- Have an experienced in team lead and responsibility of my project.
- Leading expertise in software engineering practices and methodologies.
- Having knowledge in **Azure Functions, Azure Cosmos DB**.

WORK EXPERIENCE:

- Previously worked with **PHOTON INTERACTIVE PRIVATE LIMITED** as Senior Software Engineer from 25th Feb 2021 to 28th Nov 2022.
- Previously worked with **AMZUR TECHNOLOGIES PRIVATE LIMITED** as Senior Software Engineer from 1st Aug 2016 to 28th Aug 2018.
- Previously worked with **BHUVI INFO SOLUTIONS**. As Software Engineer from 1st Apr 2015 to 29th June 2016.

PROJECT SYNOPSIS:

Project Name: Unity Handheld

Client Name : **Frontier Scientific, Inc. USA**

Duration: 5 Months (Jun 2022 to Nov 2022)

Description: It is a pharmaceutical chemical-based company. It is a FSI Repository app. It shows repository listing consists of storage condition (room temperature., etc.). It shows area listing, shelf listing and box listing respectively. The flow of the application will be repository under area under shelf under boxes. It is designed to keep based user role updated on pickup repo mode and Inventory working set operations like temp skip, perm skip, mark scanned, checked out. The regular user doesn't have access permission to process few operations.

Role : Full Stack Developer

Technologies : .Net Core WEB API, ReactJS, C#, SQL Server 2014, Visual Studio 2022.

Responsibilities

- ✓ Involved in Client Requirement & documentation.
- ✓ Designed User Interface with the implementation of Web Form using ReactJS
- ✓ Created database objects such as Tables, Views, and Stored Procedures using SQL Server.

- ✓ Responsible for Deploy applications
- ✓ Creating web application service web api.
- ✓ Testing web api service using postman tool.

Project Name: Unity Internal Inventory

Client Name : **Frontier Scientific, Inc. USA**

Duration: 6 Months (Dec 2021 to Jun-2022)

Description: It is a pharmaceutical chemical-based company. It has day to day operations like chemical compound doing purchasing and chemicals procuring and maintenance and shipping out. Chemicals are in the form of neat, liquid, Drs and plate format respectively.

Role : Full Stack Developer

Technologies : .Net Core WEB API, ReactJS, C#, SQL Server 2014, Visual Studio 2022.

Responsibilities

- ✓ Involved in Client Requirement & documentation.
- ✓ Designed User Interface with the implementation of Web Form using ReactJS
- ✓ Created database objects such as Tables, Views, and Stored Procedures using SQL.
- ✓ Responsible for Deploy applications
- ✓ Creating web application service web api.
- ✓ Testing web api service using postman tool.

Project Name: L'Oréal Paris: OAP-V3 & Kérastase.

Duration: 5 Months (April 2021 to till now)

L'Oreal Paris Description: L'Oréal has set itself the mission of offering all women and men worldwide the best of cosmetics innovation in terms of quality, efficacy and safety.

Kérastase Description: Discover expert hair care and scalp products for your unique hair type. Our shampoos, conditioners, masques, oils and styling products are designed to meet ...

Role : Software Engineer III

Technologies : Sitecore, vue.js, CSS

Responsibilities:

- ✓ Understanding client documents creating the product page
- ✓ Created and updated the Product page in Sitecore.
- ✓ Created and updated the article pages in Sitecore
- ✓ Content update as per Jira tickets
- ✓ Content migration created product and product variants
- ✓ Legacy of site downloading the media library image files and videos, uploaded in prod
- ✓ Used CSS for developing Responsive design.

Project Name: Medline

Duration: 2 Months (March 2021 to April 2021)

Medline Description: We help healthcare systems and facilities across the continuum activate the clinical and supply chain resources they need to deliver their best care.

Role : Senior Software Engineer

Technologies : WEB API, C#, SQL Server 2014, Visual Studio 2019

Responsibilities:

- ✓ Involved in Client Requirement & documentation.
- ✓ Designed User Interface with the implementation of Web Form
- ✓ Created database objects such as Tables, Views, and Stored Procedures using SQL 2014.
- ✓ Responsible for Deploy applications.
- ✓ Creating web application service web api.
- ✓ Testing web api service using postman tool.

Project Names : DYNAMIC REPORTS & CLINICAL 360

Client Name : OPTUM– TEMPA, USA

Clinical 360: The project mainly deals with maintaining the patient claim related information like the rules which are needs to apply for the claims that need to be processed. There is a rules engine which has a set of defined rules and it will apply on the claim to satisfy to be process. The satisfied claim will be sent to workflow process which will be processed based on the claim details and relatively the status will be updated in the database. Hence this data will be used for the reporting purpose. I worked on UI client-side components using the angular 5 frameworks have been created to support solution like calling api to get and post the data. In UI level designing kendo angular-ui has been used for the html components like grid, date picker, etc. We are migrating kendo angular UI changes into priming UI components like data Table, Dropdown, etc.

Dynamic Reports: The project mainly deals with generation of reports for both word and Pdf by using Sautinsoft tool in a web application. The reports are customizable like number of reports to be accessed and the numbers of sub reports to be included dynamic based on the client. We have two applications on which are generating reports based on the customizable settings provided by client and another is used to customize the reports for the client. I worked on stored procedures to get and update data in SQL to create/Modify XSLT for the reports to generate in pdf and word format and in dot net code logic to handle the report generation.

AmzurLabs: The project mainly deals with generation leaves management, employee id's, Payroll, Research Projects under one roof, streamlined process for handling ideas, etc.

Roles : Senior software Engineer

Technologies : Asp.Net Web API, XSLT, XML, LINQ, SAUTINSOFT Tool, Kendo UI Controls, Angular 2/4/5/6/8, AngularJS, SQL Server 2008.

Responsibilities:

- ✓ Involved in Design, Developing and Customizing and deploying Web Application.
- ✓ Involved in Fixing the Defects and issues and Code review and demo to the Client
- ✓ Involved in database writing Sql Queries and Stored Procedures and Functions and Triggers in SQL server 2008.
- ✓ Involved in Package, Deployment of project in production server.

Project Name : BYNDD

Client Name : Bhavani Ka, Boston—USA

Byndd-Seekers: This application is for Job Seekers. User can enter their personal details, education details, skills, presentations details in the form and can save, Edit and update the details, and user can also upload the resume directly to save details in other way. A registered User can experience or utilize the feature of this application, like contacts, mails, schedules, meetings, campus & colleges are can register to post events and campus recruitment details to other byndd users through mails, tools (User can create and manage his groups, can add users with different roles, and can conduct discussions). Services (Online Coaching's, Resume Builder) etc.

Byndd-Providers: This application is for Job providers. Organizations can enter their details regarding vacancies and inbox module allows the client to send/receive mails and manage his schedules and other details. A registered user can experience or utilize the feature of this application, like providing vacancies and getting suitable profiles etc.

Roles : Web Developer

Technologies : Asp.net MVC 5.0, LINQ, LinqToLambda, Telerik Controls (Kendo UI with MVC with jQuery) and My SQL.

Responsibilities

- ✓ Involved in Developing and Customizing and deploying Web Application.
- ✓ Involved in Fixing the Defects and issues.
- ✓ Involved in database writing Queries and Stored Procedures and Procedure in MySQL.

Project Names: Sthreenidhi Co Operative Federation & Micro Finance Institution

Client Name : State government's micro finance project of Andhra Pradesh & Telangana - India.

Sthreenidhi Co Operative Federation: The Sthreenidhi Credit Co-operative Federation Ltd (www.sthreenidhi.ap.gov.in) is a state government's micro finance project of Andhra Pradesh and Telangana. Which was set up for women self-help groups (SHGs) as an alternative low-cost delivery solution to the private microfinance lending in Andhra Pradesh and Telangana. This Project is aimed to promote rural women to start their own business with low interests? The government gives 100 percent interest subvention to women borrowers on prompt repayment of loans.

1. The Sthreenidhi Cooperative Federation LTD is State Level Project of Banking Software that deals with disbursement and Repayments from the customer which has taken the loan from the Government.
2. The loan which was given to that member is called disbursement, and the collection which is coming from that particular loan member is called Repayments which is also called as Recoveries.
3. Here the loan request is requested from member to SHG (Self Helper Group) group, and from that SHG group the loan will request directly to the Sthreenidhi Office through telephone.
4. The loan will be sanctioned within 48 hours through IVRS system and also from EFMS system from district level to that particular SHG group.
5. The Flow of the loan sanctioned will be in this order i.e., District to Mandal, and from that Mandal to VO (Village Organization), and from VO to SHG, And from SHG to that particular member the loan will be disbursed.
6. The Field Officer i.e., the VO will collect the recoveries (Repayments) from that members who have taken loan from Sthreenidhi per every month, and this amount will be paid to a particular bank of that VO.
7. By taking that amount which was paid by the VO in the bank, we will split that amount into principal and interest and we will do some calculational also.
8. Some amount of margin will be given to that particular VO who is collecting the recovery amount from the members.
9. Our involvement in that project is MIS (Management Information System) MIS contains the full details of that particular loan that is dues, over dues, Interest over dues, demand.
10. In this MIS information we will tell the full loan structure and full information of that particular loan.
11. The Sthreenidhi is also involved in Financial Calculation like Debits, Credits, Trail Balance, Balance Sheet, Income and Expenditure.

Micro Finance Institution: The Project micro finance institution is a complete solution for the private Micro finance business organization needs. This desktop application helps Our clients who are into the Micro finance business especially in rural areas. This application takes care of all the day to day

banking transactions. This User-friendly application helps our clients by providing complete details of customer Including but not limited to their savings, withdrawals, loans & EMI. Other features of this application include generation of report on daily transactions, calculation of interests on savings, loans based on Time period. All these activities are with speed and accuracy. Application can Automatically generate unique voucher, payment and receipt numbers also. This project is developed using Krypton toolkit.

Roles : Software Engineer

Technologies : ASP.NET, VB.NET, C#.Net, AJAX Toolkit, Microsoft SQL Server.

Responsibilities

- ✓ Involved in Developing and Customizing and deploying Web Application.
- ✓ Involved in Fixing the Defects and issues.
- ✓ Involved in database writing Sql Queries and Stored Procedures and Functions and Indexes and Triggers and Views in SQL server 2008.

DECLARATION:

I hereby declare that the above particulars furnished by me are true to the best of my knowledge and belief. I assure you, if I get a chance, I will execute my work to the fullest satisfaction of my superiors.
