- CSS (4 years)
- Node.js (3 years)
- Mogodb (3 years)
- Express (3 years)
- Reactjs (3 years)

## Roles & Responsibilities

---

Some projects I've worked on the Frontend part some on Backend part

In Frontend I used React created reusable Components and used Redux for State management In CSS Framework I worked on Bootstrap as well as Tailwind.

In Backend I used Nodejs Framework there I created several REST APIs and also Integrated 3rd Party APIs as well.  
For Security and Authentication, I used JWT.

Database I have mostly used MongoDB and Google Firestore, document-based NoSQL Databases.

For maintaining code used Git.

In DevOps

For Production Backend testing Server used Heroku & Google Firebase.

Work from scratch as well as in between the project.

Worked Individually as well as lead some projects.

## Languages

---

- Hindi - Fluent
- English - Intermediate

## Certifications and Licenses

---

### CCNA
