PROJECT DETAILS

1.Ekbazaar

- <https://trade.ekbazaar.com>
- It is a B2B Business Portal. Where we have used technologies like Node ,Express , React , MongoDB , SQL , Elastic Search.
- In Ek bazaar trade we have two types User Buyer and Seller. Sellers can create the account and add the products. If any buyer wants to buy any product or wants quotations, the buyer can contact the seller.

2.Beatrout

- <https://beatroute.co/>
- Beatrout project is basically for Buying and selling beats.
- It is Platform where artist can upload there tracks and interested buyer can purchase licence of tracks.

3.ELI

- It is Application Tracking System, which based on Microservice Architecture. Where we have used technologies like Node, Python, Angular, PHP, mongoBD, Apache Airflow, Cache Management (RabbitMQ), Elastic Search
- Project is highly scalable which can handle the loads of 100k+ data at a time for searching, sending mails/Sms and managing the users.
