

Saurabh Jain

Senior software engineer

MEAN stack developer with 4 year of experience. Worked as Full stack Developer to build Mobile Web Apps using MEAN and Webaxn Framework (Based on JS). Worked onsite in GHANA and NIGERIA for 14 months to deliver telecom hybrid apps for cross platforms used by millions of users.

EXPERIENCE

Mahindra Comviva, Bengaluru -

2018- PRESENT

Achievements/Tasks

- **AT&T Mexico Website** — Worked with a team of 4 developers to build a Responsive website based on MEAN stack. Key responsibilities are to develop Node APIs , creating DB Schemas, and create UI from figma using Angular, and Angular Material.
- **AT&T Mexico 3pp Plugin** — Created NodeJS plugin that manages around 80 third party APIs with a single configuration . It handles all aspects related to API management like logging, timeout , mock response ,CDR generation for monitoring etc. All 80 APIs can be consumed via a single plugin making the 3pp API integration cleaner, manageable and efficient.
- **MyMTN Ghana/Nigeria Telecom App** : Built myMTN for multiple countries, a Selfcare App built on WebAxn framework using JavaScript, HTML, CSS for frontend, used SOAP & REST web services, consumed 100 plus different 3pp API using XSLT parser .
- **PWA Momo App** — PWA website clone developed keeping the accessibility on mobile devices as priority using MEAN stack. Features like offline experience , Add to Home screen were used that provides native app experience. Single Code base , Run anywhere, be it Android app, iOS app or Website..

EDUCATION

Jamia Millia Islamia, Delhi — B.tech (ECE)

2014 - 2018

Percentage - 91%
