ASHISH RAWAT

SENIOR SYSTEM ENGINEER

PERSONAL PROFILE

I am working as a Senior system engineer in Infosys, I hold 2.7 years of IT experience. Worked for Clients like Sysco and Mars as a Full Stack Developer(Mern/Mean).

WORK EXPERIENCE

Developer

|Working as a Mean Stack developer for Client MARS, DEC 2019 - Present

- Created Agnostic advance portal web app for the different European market regions under the project "Mars Agnostic", latter on held deployment and time to time configuration for each market
- Added new advanced features and resolve bug issues from time to time for the Mars web application.
- Worked in backend on Node.js and Express.js

Developer

|Working as a Mern Stack developer for Client SYSCO, Dec 2019 - Jan 2022

- Worked and Managed complex projects called "Periscope" from start to finish.
- Collaborated with other Team members to work on and develop "My Sysco" web apps, translated client requirements into polished, high-level designs web application
- Worked and resolved the Sysco B2C delivery App issue, so that it does not crash while navigating to order of past date.
- Load & Integrate the Sysco B2B application using react-router defined its route while concatenating modules during app bootstrap, evaluated performance improvement in the latest version to check and support more extensive development of Sysco Mobile shop app.
- Worked in backend on Node.js and Express.js
