## Summary

- Over 3 years of experience in developing cross browser compatible web applications as MERN Stack developer in various domains including education, social network and open source.
- Experience of developing MERN applications using web technologies like HTML5, CSS3, JavaScript (ES6), React.js, nodejs and mongodb etc from scratch.
- Strong understanding of using React-Router to turn React application into Single Page Application (SPA).
- Extensive experience of using Redux and Context for managing state and keeping it in a single source of truth based on flux pattern.
- Familiar with tools like Webpack as module bundler, Node Package Manager (NPM), Babel for ES6 transpiling, ESLint for linting etc.
- Hands on experience of using Git for version controlling, VPS and nginx for production deployment.

## Professional Experience

**Bestone Industries (BIPL) – Noida**

May 2021 – Present

### MERN Stack Developer

#### Pre2Uni (User Panel) And Pre2uni (Admin Panel)

Pre2Uni is one-stop solution for making college and course selection easy for students in India. It offers specific information for students across the popular education streams like Engineering, Management, Finance etc. It helps students to make right decision in college selection and connect with the authorised representative of college.
