

VIJAY KUMAR

FULL STACK DEVELOPER

MOBILE: +918307181190, EMAIL: 96VIJAYS96@GMAIL.COM

PROFILE

- I have more than 2 years of software development experience.
- Having good experience in NodeJs and GraphQL.
- Hands on experience in creating BFF in GraphQL with Typescript.
- Good understanding of GraphQL Resolvers, Queries, Mutations and Subscriptions.
- Worked on Micro Services Architecture.
- Expertise in developing applications with Apollo and GraphQL with ReactJs.
- Expertise in creating and consuming REST API's in GraphQL. • Have good knowledge on ReactJs and other UI frameworks.
- Good understanding and usage of states and props in ReactJS with Redux flow.
- Exposure of submitting the work at the end of the day on Bitbucket and Test Flight.
- Experience in creating requirements analysis for projects, communication with clients, tasks planning and development.
- Hands on experience in JIRA, Bitbucket and Github.
- Good Knowledge on ES6 features of Javascript.
- Have good understanding of Docker and Azure.
- Hands on experience of creating Single Page Applications.

EXPERIENCE

FULL STACK DEVELOPER, THEAUTOPARTSSHOP

TECHNOLOGY STACK

Typescript, GraphQL Apollo Server and client, SCSS, Material UI and ReactJS

DESCRIPTION:

TheAutoPartsShop distributes auto parts and accessories to 48 states within the U.S. The Auto Parts Shop has a comprehensive catalog for over a million unique parts and accessories. We cover most makes and models of parts sold in the U.S. A partial list of part types we provide includes brake pads, headlights, shock absorbers as well as many more products for your motor vehicle. TheAutoPartsShop can help you easily find the right car accessories..

ROLES AND RESPONSIBILITIES

- Developed Shopping Cart (Queries, Mutations) using GraphQL server.
- Payment page: Address, Card, Authentication Mutations.
- Created GraphQL Resolvers for different services.

- Added Custom Resolvers for some services.
- Done Error Handling in GraphQL.
- Worked on subscription to update the Prices.
- API Integrations Address Verification, Order Processing Services, Fraud Detection
- Payment Integration: Authorized .net, Paypal, Apple Pay, Google Pay.
- Search Pages: Search API integration in GraphQL, implementation of search queries on front end.
- Category Page: Category API integration in GraphQL, implementation of search queries on frontend
- Product Listing Page: API implementation and integration in react and graphql.

FULL STACK DEVELOPER, PLUSMORE

TECHNOLOGY STACK: Node, GraphQL, Relay, React and Redux.

DESCRIPTION:

PlusMore is an E-commerce store with the latest trends. PlusMore store is having unlimited car parts and accessories for various automobile industries. Based on the filters, the store suggests suitable auto parts as per the requirements

ROLES AND RESPONSIBILITIES:

- Developed Customer Service Portal (React + GraphQL)
- Developed Voucher System(React + Node + GraphQL)
- Created GraphQL Queries and Mutations and integrated on the frontend as well.
- Authentication (Login).
- Work with the team on developing server-side applications using NodeJs.
- Work on the Back-end services of the customer-facing UI and also for payment processing administration.

FULL STACK DEVELOPER, FORTUNE COINS TECHNOLOGY STACK React, Redux, Redux-Thunk.

DESCRIPTION:

In Fortune coin, we can purchase coins, Play games, and win coins or rewards. In this, we have multiple games. In this User can be able to see his daily bonus. Free coins and special offers. Also, have a KYC feature base on that we can verify a user. Also, have referred to a friend feature. We can invite our friends through Social Media or channels and based on that we get referral bonus awards.

ROLES AND RESPONSIBILITIES

- In this user can log in and signup using Facebook.
- Refer to an invite link through any social media or channels.

- Purchase coins.
- KYC verification.
- Implemented things like user can view special offer daily bonus rewards.

FULL STACK DEVELOPER, METAMINTS

TECHNOLOGY STACK

PostgreSQL, React, Node APIs, etc.

DESCRIPTION:

It provides information about other data; in the case of an NFT, it describes NFT's essential properties, including its name, description, and anything else its creator feels is important. I have created a dashboard where the admin can create and delete projects. Proper control is in the hand of the admin. I have configured MetaMask to buy, sell, fetch the balance, and transfer tokens using web3js. Implemented the events of web3js to show the transaction status and update the UI.

ROLES AND RESPONSIBILITIES:

- I augmented the existing solution to leverage Blockchain principles.
- Develop DApps using HTML, CSS, JavaScript, ReactJS, NodeJS.
- Interacting web application with Ethereum Blockchain using web3 Node API.
- Store the Cryptographic signature of the document as transactions on the Ethereum blockchain.
- Run personal Block chain for Ethereum development using Ganache and Truffle Develop.

JAVASCRIPT DEVELOPER, STARTTERA TECHNOLOGY

STACK

React, Javascript and NodeJS

DESCRIPTION:

This is a terra and luna-based project. Terra's native token, LUNA, is used to stabilise the price of the protocol's stable-coins. LUNA holders are also able to submit and vote on governance proposals. Admin can create and send projects to sell the currency. I have configured MetaMask to buy, sell, fetch the balance, and transfer tokens using web3js. This extension injects the Ethereum web3 and Node API into the website's javascript context so that dapps can read from the blockchain.

ROLES AND RESPONSIBILITIES

- Developing web-based applications in ReactJS and storing the transactions in Ethereum Blockchain.
- As a NodeJS developer, I was responsible for writing server-side web application logic in JavaScript.
- Develop back-end components using NodeJS and connect the application with the other (often third-party) web services.
- Support the front-end developers by integrating their work with the NodeJS application.

EDUCATION

Kurukshetra University, Kurukshetra, Haryana, India

Bachelor of Computer Applications Information Technology

SKILLS

- GraphQL
- Apollo
- Typescript
- ExpressJs
- MongoDB
- Relay
- Redux
- Javascript
- ReactJS
