June 2015 – April 2019

PROJECTS

- **IAM Micro Service**
New service was developed to migrate the authentication from a monolithic architecture to a new micro service.
- **SAML OAUTH Authentication**
OAUTH integration with Okta for SAML based authentication.
- **PayLater Payment Medium**
New payment medium was introduced in addition to card, netbanking, Upi etc. which works like a postpaid bill payments.

-
- **UPI Intent**
UPI intent to allow payments using another PSP application.
 - API development for updating merchant key for various Payment Gateways.
 - A demo project for identity management using Spring Boot.
 - **Travel Requisition Dashboard**
A dashboard was developed to show varied actions for the product and to modify the view as per the client specifications and requirement.
 - **Profile Completion Configuration**
Configuration was developed to calculate a particular user's profile completion percentage based on the parameters and their weightage, configurable as per the client.
 - **Travel Requisition Action Config**
Configuration to control display of various actions on the basis of user and status.
 - **Travolution Project**
 - Modularization of one of the key pages and its templatization using DUST.
 - Was part of the team to develop new UI for one of the key clients and to check for its support in all major browsers.
 - Developed a dashboard to view data as Pie chart, action button, bar chart, Recent stream etc.
 - Internationalization of product: To enable easy localization for target audiences that vary in region or language.
 - Worked for New and Responsive UI for Trip : Designed the application with Responsive web design to adapt the layout to the viewing environment. Created new trip form to support responsiveness with an effective UI using media queries and proportion-based grids and to configure the view as per different client requirements.
 - Also done various enhancements and fixes in the tool. These developments/ integrations involves technologies like UI development using JSP/JS, JQuery, Bootstrap. Backend development using Core JAVA, XML Parsing, SAML, SSO and SOAP based services. Also used, DUST and Velocity languages for templatization.
