PROJECTS

SOCIAL LINKS

- <https://www.linkedin.com/in/yashvinder-kashyap-629198189/>

Tul:si, 2 Months

This project is related to the cyber security, So in this project user can register itself for the two purposes the first one is as an organization and the second one is as a researcher/hacker. So the organizations can upload their projects or apk files and create a bounties for that on which they want to find the bugs from the users and after creating a bounty from the organization user will reports the bugs if they found any then tulsi team check that bug if that was a valid or invalid bug and accordingly inform the organization and researcher will get paid.

Myntra Clone, 5 Days

This is just for the learning purpose, this project is created using the HTML, CSS, JavaScript, React all together. In this website there are different kind of products are stored on home page. It allows the user to select and add the products in the cart. It also allows to add few filters on the products like according to the gender, price low to high, Better discount etc.

Tessereact Academy, 2 Months

This project is for selling the AI and Machine learning courses so in this project, Anyone can create their account in this platform and purchase a course from this website.
