<b>Project Description</b>	
Design and Develop series of Web Applications, which will support tracking shipments, SKU, containers. This project will coordinate process of moving goods from one location to another, focus on better organizing the goods, by different means of transport, processes data in order to be more efficient. At least until teleportation is possible. This project includes different sub projects which one of them will have <b>shipment tracking</b> functionality, while the other will have <b>shipment creating</b> functionality. Shipment creating application will have multiple portals to create/reject/accept the shipments by multiple user types e.g., vendor, admin, user, super admin, etc. This project will also have a <b>contract builder system</b> , where user could choose one of the contract templates from the application or he can bring his own template. This application will improve contract management by managing contract conditions, payment terms, delivery in full, etc. all under one platform.	

<b>Project Title</b>	Xpress Bill Solution.
<b>Project Type</b>	Development
<b>Primary Skills</b>	Web API, C#,SQL
<b>Sub Skills</b>	Entity Framework, LINQ
<b>Software</b>	Visual Studio 2017 Professional, SQL Server workbench,
<b>Team Size</b>	15
<b>Role</b>	Software Engineer
<b>Project Description</b>	
<p>Xpress Bill Pay has developed an innovative web-based online bill payment system. The system makes it easy for organizations both large and small to offer online bill payment to their customers – allowing them to pay their bills online with credit cards, debit cards or electronic fund transfers. Customers go to our website, log on, and have immediate access to their account where their bills are presented just like the paper bill they’re familiar with. The system is easy to set up and easy to use.</p>	

<b>Project Title</b>	Faronics Deploy
<b>Duration</b>	1year
<b>Project Type</b>	Development
<b>Primary Skills</b>	C#,JavaScript/Jquery,HTML,CSS,SQL Server, Bootstrap,Angular 6, Web API
<b>Sub Skills</b>	Entity Framework, LINQ, DevExpress Grid
<b>Software</b>	Visual Studio Express 2015 for web, SQL Server Management studio,
<b>Team Size</b>	8
