#### **EDUCATION**

ED C CITION	
Nxtwave Disruptive Technologies Industry Ready Certification in Full-stack Development	Mar '15- Ongoing
mustry Ready Certification in Full-stack Development	
Victory Institute, Visakhapatnam	2019
Diploma in Aviation and Hospitality 69%	
Seetha Polytechnic College, Bhimavaram	2018
Finished 132 out of 156 credits towards EEE in diploma	
Ushodaya Public school, Thimmapuram	2015
Secondary School Of Certificate 67%	

#### **SKILLS**

Frontend: HTML, CSS, Bootstrap, JavaScript, React.js

**Backend**: Python, Express, Node.js

**Databases** : SQLite

#### **PROJECTS**

### **Food Munch**

Developed a responsive website for Food Store where users can see a list of food items, detailed information about a food item, offers.

Designed page using following HTML structure elements like li, header, article, footer elements, and different bootstrap components to show different sections in the website and different bootstrap classes for responsiveness through the mobile-first approach.

Implemented product youtube videos by using bootstrap embed and model components

Technologies used: HTML, CSS, Bootstrap (rajufoodsite.ccbp.tech))

#### Jobby App

Implemented Jobby App where users can log in and can see a list of jobs with search by Job title, filters based on Salary range and Employment type, etc

- Implemented different pages like Login, Home, Jobs, Job item details using React components, props, state, lists, event handlers, form inputs.
- Authenticating by taking username, password and doing login post HTTP API Call.
- Persisted user login state by keeping jwt token in client storage, Sending it in headers of further API calls to authorize the user.
- Implemented different routes for Login, Home, Jobs, Job item details pages by using React Router components Route, Switch, Link.
- Implemented filters and search text by sending them as query parameters to jobs API calls.
- Redirecting to the login page if the user tries to open Home, Jobs, Job item details routes which need authentication by implementing protected Route.
- **Technologies used:** React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication (rajujobby451.ccbp.tech)

## **Nxt Watch**

Implemented Nxt Watch application which is a clone for YouTube where users can log in and can see a list of videos like Trending, Gaming, Saved videos, and also can search videos and view specific video details, and users can toggle the theme (Light/Dark).

- Implemented Different pages like Login, Home, Trending, Gaming, Saved videos using React components, props, state, lists, event handlers, form inputs.
- Authenticating by taking username, password and doing login post HTTP API Call.
- Persisted user login state by keeping jwt token in local storage, Sending it in headers of further API calls to authorize the user.
- Implemented different routes for Login, Home, Trending, Gaming, Saved videos, Video item details pages by using React Router components Route, Switch, Link.
- Redirecting to the login page if the user tries to open Home, Trending, Gaming, Saved videos, Video item details routes which need authentication by implementing protected Route.

**Technologies used:** React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication (rajunxt451.cccbp.tech)
