Experience

Jan 2020 - March 2022

Software Trainee

Liqvid eLearning Services, Noida

- Worked on a L2pro India project, designed the frontend module for intermeditate and advance versions.
- Worked on a UNWFP project, that focuses on correct way to cook in rural school run by government.
- Worked on certain LMS based storyline courses for different online teaching portals.

Projects

Group Chat application

This is a demo application I made for my NodeJS learning. It has a page which can be accessed from multiple TAB or browser and asks for a username. Each tab represent a user and message sent by a tab is received by every other user in real-time. And closing the tab will make the user exit the group chat.

SmartBrain (Clarifai API)

This is a demo application I made for my NodeJS learning. It has a page for user registration and signin. Once a registered user logs in, he can give a image url and hit Detect the API will detect the face portion and highlight in Blue.
