PROJECTS

- There are many projects I have worked with in PHP, Laravel, Codeigniter and VueJS. I am sharing my latest project detail and link of other project details i have worked with [here](#)

STRINGERP — *Laravel*

- StringERP is an ERP product to manage textile industry operations at one place whether it is manufacturing or orders or any accounting related things etc…

- It contains multiple roles to manage things differently.

- It contains modules to manage leads, sales orders, purchase orders, challans, vouchers, credit/debit notes, registers, production and many other modules.
