Year of Passing	2016
Grade	85-89.9%

WORK EXPERIENCE

May 2022 to Present

Web Developer at DigiMantra

I am an experienced MERN stack developer with expertise in MongoDB, ExpressJS, ReactJS, and NodeJS. I specialize in building RESTful APIs, creating dynamic front-end interfaces, and optimizing applications for performance, scalability, and security. With excellent communication, problem-solving, and analytical skills, I work collaboratively in a team environment to develop innovative solutions. I am passionate about staying up-to-date with the latest industry trends and continuously improving my skills. If you're looking for a skilled and dedicated MERN stack developer, I would be thrilled to hear from you.

Aug 2020 to May 2022

Web Developer at Fab Web Studio

As a MERN Stack Developer with proficiency in ReactJS, NextJS, TypeScript, Node.js, ExpressJS, MongoDB, HTML/CSS, Tailwind CSS, REST APIs, Firebase, and GraphQL, I was responsible for developing and delivering high-quality web applications for the company. I worked collaboratively with cross-functional teams to create innovative solutions and ensure the timely delivery of projects. My key responsibilities included developing and maintaining the front-end and back-end of web applications, designing and implementing RESTful APIs, integrating with third-party services, and ensuring the scalability and performance of the applications.

Jun 2019 to Jun 2020

Web Developer at Vibcare

In my previous role, I collaborated with cross-functional teams to develop and deliver high-quality web applications. My responsibilities included developing and maintaining both the front-end and back-end of web applications, designing and implementing RESTful APIs, and integrating with third-party services. I also ensured the scalability and performance of the applications to meet the company's standards.

PROJECTS

E-Commerce Website, 257 Days

Developed admin and business panel, and user website(Backend + Frontend) for buying products, and implemented basic e-commerce features like orders , voucher and buy points by paying on stripe with wallet with different currencies also deployed on AWS E2C added CI/CD with jenkins.

Real-time Chat Application, 31 Days

Developed a node backend with socket.io for WebSockets and MySQL with Sequelize ORM, and created a React application with Vite and socket.io client for real-time chats and events.

Job Portal, 242 Days

Created job portal admin panel with Material UI for adding jobs, developed website in NextJS with auth, and showed users their eligible jobs. Created mobile app with React Native with social auth and filtering feature with notification with help of FCM and node code in Firebase Cloud Functions to run on db triggers.

Music Application, 59 Days

Developed all features for adding songs with album and singer information, implemented role-based login with JWT authentication, and created APIs with Express for the backend dashboard with Material UI.

Shopify Rewards Sharing and Deal-Adding App, 212 Days

Developed a rewards sharing and deal-adding app for Shopify website, implemented Stripe payment gateway and GraphQL APIs, and converted design from Figma to React components. Worked on backend UI using NextJS, Polaris UI, GraphQL API, and Apollo Client.

Custom CRM for Order Management, 92 Days

Developed a custom CRM for a company to manage user orders with authentication and a list of all the products the user has

purchased. Implemented OTP verification and integrated the system with an e-commerce website. Used Bootstrap for styling, Axios for API calls, and worked on both frontend and backend.
