Summary

Skilled and results-oriented Software Engineer with more than *2+ years* of experience working in a variety of environments with a breadth of programs and technologies.Strong in design and integration problem-solving skills. Expert in Node Js environment. Strong in written and verbal communications.

Technical Summary

- Around **2 years** of experience in developing web applications in Agile environment with NODEJS with Sequelize ORM for **MySQL**.
- Good experience in creating views with the help of EJS Templates , **Jquery, AJAX, Node JS**, **Express** and **MongoDB**.
- Experience in building express APIs using **NODE JS**
- Good Knowledge on Third Party Libraries and API Integration.
- Around **2 years of** experience in **Reactjs** with **Material-UI/Bootstrap** to create interactive user interfaces.
- Knowledge on **Github** and **Gitlab** to maintain code and have good experience in bug tracking,issue tracking and project management using **Jira.**
- Having experience in usage of **ES6** and **ES7** Features.
- Good experience in documenting **REST APIs** in **Swagger** file

Technical Skills

- Programing languages   : Javascript
- Server environment   : Nodejs
- Frameworks   : Express.js
- Cloud Services   : Heroku, AWS
- User Interfaces   : ReactJs, HTML, CSS3, Bootstrap, Ajax, JSON
- API Testing Tools   : Postman, Swagger
- Database   : MySQL, MongoDB, Sequelize(ORM)
- Architecture   : MVC
- Code Editing Tools   : VS Code, Sublime Text 3
- Tools   : EDI Tool, ApacheJmeter
- Operating systems   : Ubuntu 18.04, Windows 10

Education

Jawaharlal Nehru technological university

M.B.A (Finance)
Kakinada, Andhra Pradesh
Graduated **Jun 2017**

Employment History

Axis bank

Relationship Officers

Kakinada, Andhra Pradesh

Nov 2017 –Jan 2020

Bepec Solutions
Software Engineer
Bangalore, Karnataka
Feb 2020 – Sep 2022

Project Summary

Project #1 : **Client Interface and EDIs**

Client : Cartus

Duration: Mar-2022(currently working)

Technologies Used: NodeJs, Javascript, EDI Tool, SFTP

Description : Transferring billing , payroll data to clients over SFTP in any format, Sending Email notifications.

Responsibilities :

- Worked and took ownership of handling all EDI processes and Interact with clients to complete their clarizen requests.
- Build EDI processes for various clients like Google, KPMG, AIG, Goldmansachs Etc.

Project #2 : **HMIS**(Health Management Information System)

Client : health & family welfare department(TN) & **CGHS**(pune)

Role : Software Developer

Duration: Feb 2020 to Mar-2022

Technologies Used: ReactJs, NodeJs, MySql, Sequelize ORM, AWS

Description : The hospital management system organizes the stable functioning of daily tasks and interactions. This is a special tool to support the smooth operating of the software components that are vital for the clinic administration. The hospital records management software keeps a track of all the operations, stores the users' data, performs its analysis and generates the reports. It includes the patient and doctors' records as well as the data concerning financial affairs, supply management, etc.

Responsibilities :

- Worked as part of a team developing application and service using Agile development methods
- Build back-end services for various modules such as Registration, Login, Appmanager, Inventory, In-Patient management and EMR(Electronic medical records).
- Writing reusable, testable, efficient code.
- Effectively use tools and ingenuity to identify and fixed defects before they become a problem
