## PERSONAL PROJECTS

Weather app using html, CSS and JavaScript (08/2022 - 08/2022)

- In this weather app, you can get the weather details of a particular city by entering the city name or you can also get your current location weather details by clicking on the "Get Device Location" button. If you entered an invalid city name then there is shown an error message.

User registration from using java, spring mvc and MySQL. (01/2023 - 02/2023)

- In this project, we'll implement a basic registration process with Spring Security. We'll be building on top of the concepts, where we looked at login. The goal here is to add a full registration process that allows a user to sign up, as well as validates and persists user data.
