EMPLOYMENT HISTORY

Full Stack Developer , Zapbuild Technologies PVT LTD.
Mohali

Jan 2020 — Feb 2021

My work there was to make the all logical part of the website including the backend and the frontend part. Backend was on Laravel (PHP framework) and Frontend was on the React js(Library of Javascript).

There i worked on two different live projects, one was for the cannabis product and stores with different stores and second was for Listings and selling the properties.

System Engineer | MERN Stack Developer,- Tata Consultancy Services
Noida

Feb 2021 — Present

I am working as a Full Stack developer in a project. My role is to create and manage API integrations,Frontend designs using React js,React hooks, react MUI,Redux for state handling, jsx, babel and more.

Working on node js as the backend , using its Express js web application framework, its components, NPM, Events, buffers, FileSystem, making the backend more fast and stable and scalable.
