Project Details:

Project Involved: XCD

Team size   **:** 2

Environment   **:** React-native, MobX

Synopsis   **:** X-CD's conference & association management software is the easiest to use and most flexible planning experience available. The system consists of a variety of modules which can be enabled for any number of conferences.

Their specialties in, Conference Management Software, Event Registration, Conference Recording, Abstract Submission, Lead Retrieval, Peer Review, Exhibitor Registration, Paper Submission, Association Management, Mobile Apps, and Continuing Education

Project Involved: Algomax (Desights)

Team size   **:** 4

Environment   **:** ReactJS, Web3.js, MetaMask, Redux

Synopsis   **:** Desights is a web3 platform to crowdsource solutions to the toughest AI & ML challenges. whoever wants to find a solution for a challenge, he can use this application (just like stackoverflow and kaggle). If a user wants to create a challenge, he has to spend some tokens (polygon matic) to publish a challenge. And many of the people can participate to resolve that challenge and which challenge is accept by the creator, then the user can get the reward amount. Currently it supports polygon matic token only. We used IPFS to upload the user and challenge details.

Project Involved: GRIO and SPORTS TV (Tringapps)

Team size   **:** 8

Environment   **:** React-native, Redux, Thunk, Typescript

Synopsis: Grio and Sports Tv are the android and IOS tv and mobile application, Which is used for playing programs and channels, and we can favorite the program and watch it later.

Project Involved: Artwork Gallery

Client   : UK

Team size   : 2

Environment   **:** ReactJs, Redux, React Native, Realm

Synopsis   **:** Artwork Manager - Managed Artwork provides cloud-based portfolio and website management software tailored exclusively to the needs of fine art galleries and artists. Admin can manage all the artworks uploaded by artists. It has different modules in admin like Inventory, Consignment, Contact, Marketing, Invoice, Email Campaign, Transactions, Reports, Website and Media Library.

Project Involved: Re-order

Client   : Singapore

Team size   : 2

Environment   : React, React Native, Redux

Synopsis   : Re-order is a perfect solution for shopping without worry about future offers and standing in a long queue for billing and buying products which isn't suitable for you. By adding in automation in shopping, retailers too will get the benefits like marketing the products based on user's interest and by default automating will reduce the man-power etc.

Project Involved: Taxi App

Client   : UK

Team size   : 2

Environment   **:** Redux, React Native,

Synopsis   : Taxi App – It is a OLA, Uber kind of app. There are Driver and Rider roles. Once Rider initiated request to search taxi, all taxi drivers available in nearby 5 kms will get request. Driver who can first accept the request can pick the order. Once driver accepted, Rider can view the taxi route in online. Rider can take the journey and pay the bill once ride complete. We can log order and payment history as well. Through Admin we can manage to add/update driver details.
