Team Size	: 15
Web Technologies	: React.js, Node.js
Responsibilities	:

- ➢ Understanding the requirements from product team and implementing the same on application.
- ➢ Web apps development React.js.
- ➢ Give demo to product team on working task after sprint complete
- ➢ Frontend webpages are designed using React.js.
- ➢ Git (version management system)

Project #2

Title	: **Order Management Service**
Role	: Developer
Team Size	: 7
Web Technologies	: React.js, Node.js
Responsibilities	:

- ➢ Understanding the requirements from product team and implementing the same on application.
- ➢ Give demo to product team on working task after sprint complete
- ➢ Frontend webpages are designed using React.js and for Backend development operation Nodejs is used.
- ➢ Git (version management system)

Project #3

Title	: **Mulin**
Role	: Developer
Team Size	: 4
Web Technologies	: React.js, Node.js
Responsibilities	:

- ➢ Understanding the requirements from product team and implementing the same on application
- ➢ Give demo to product team on working task after sprint complete
- ➢ Frontend webpages are designed using React.js and for Backend development operation Nodejs is used.
- ➢ Git (version management system)

Project #4

Title	: **AWES**
Role	: Developer
Team Size	: 15
Web Technologies	: LARAVEL, PHP, PostgreSQL, SMS API Integration
Responsibilities	:

- ➢ Understood the requirements from product manager and implementing the same on application
- ➢ Frontend webpages are designed using HTML, CSS and for Backend development operation Laravel, PHP are used.
- ➢ Conducting code reviews
- ➢ SVN (version management system) & Firebug (bug tracking system)

Project #5

Title	: **OAVS**
Role	: Developer
Team Size	: 7
Web Technologies	: LARAVEL, JAVASCRIPT, AJAX, JQUERY, HTML, CSS, PHP, PostgreSQL, Bulk SMS API
Responsibilities	:

- ➢ Understood the requirements from product manager and implementing the same on application
- ➢ Frontend webpages are designed using HTML, CSS and for Backend development operation Laravel, PHP are used.
- ➢ Conducting code reviews
- ➢ SVN (version management system) & Firebug (bug tracking system)

Project #6

Title	: **ES Campus**
Role	: Developer
Team Size	: 10
Web Technologies	: HTML, CSS, JAVASCRIPT, AJAX, JQUERY, PHP, MY SQL
Responsibilities	:

- ➢ Understood the requirements from product manager my and implementing the same on application
- ➢ Frontend webpages are designed using HTML, CSS and for Backend development operation core PHP are used.
- ➢ SVN (version management system) & Firebug (bug tracking system)

Project #7

Title	: **ESTCAMPUS**
Role	: Developer
Team Size	: 10
Web Technologies	: HTML, CSS, JAVASCRIPT, AJAX, JQUERY, PHP, PostgreSQL
Responsibilities	:

- ➢ Understood the requirements and implementing the same
- ➢ Web apps development using Core PHP
- ➢ Completely developed Cafeteria module.
- ➢ Developed canteen and store module with team.

SKILLS

- ➢ **Web Technologies:** React.js, Node.js, HTML5, CSS3, JavaScript, jQuery, Ajax, Bootstrap, XML/JSON, PHP, REST API.
- ➢ **Tools:** Notepad++, SQLYog, Codelobster**,** Visual Studio Code
- ➢ **Data Base:** MYSQL, PostgreSQL, MongoDB
- ➢ **Packages:** MS- Office 2003 / 2007 / 2010
- ➢ **Version Control:** SVN, GIT
- ➢ **Google Cloud Storage :** Google Bucket

PERSONAL DOSSIER

Main Technology   : React.js, Node.js, PHP, HTML, CSS, Javascript, Jquery, Ajax, MongoDB, PostgreSQL, MYSQL Mongo DB

Overall Experience   : 5 years 2 month

Skills/Abilities   : Web Development / User Interface Development / Responsive Design

Pan Card No   : AVXPJ3294M

DOB   : 27-05-1992

Contact No   : 8984292050

Alternative Contact No : 7978262705

Place: Bhubaneswar

Date: **Signature**
