- Basic knowledge of Microsoft Power BI.
- Repository: GIT (Bitbucket, Github)
- Operating System : Windows, Ubuntu.
- Tools: Visual Studio Code, Postman, Swagger, Jira
- Basic knowledge in Microsoft Azure DevOps and AWS.

PROJECTS

- **Pfizer Search Pro :** This is a search feature which allows searching for content on pfizer website. We can search for events, videos and materials. AWS elastic search is used for backend and Helix component is used for frontend to build this feature . My role is to create the token and debug the feature if any bug is raised.

- **Pfizer GDO:** This is a US based healthcare product. This product is developed on Canvas Tool and stencil JS for frontend and drupal for backend. My role is to resolve all the technical issues on this project. I have worked on stencil JS, Canvas Tool and drupal and also doing market onboarding using drupal in this project.

- **Members-Only Mobile App:** This app brings to you the best of the SMART Buildings, Community Engagement and curated Commerce Choices right at your fingertips. This is a mobile app which is built on **React Native**. I have worked on some modules of UI only:
    - **Events**
    - **Ignite**
    - **Access**
    - **Polling**
    - **Community**
    - Technology Used :-
        - React Native
        - CSS
        - Git

- **Members-Only App Dashboard :** This is a dashboard of members-only app where admin can manage the Bookpod, Community, Events, Offers, Categories. The app brings to you the best of the SMART Buildings, Community Engagement and curated Commerce Choices right at your fingertips. I have worked on some modules of dashboard which are:
    - **Bookpod**
    - **Offers**
    - **Category**
    - **Brand**
    - **Community**
    - **Events**
    - Technology Used :-
        - React JS
        - HTML
        - CSS (Material UI)
        - Git

- **Token System Clinic Management System :** This is a token management system of a clinic in which customers can take a token and the token will automatically generated. **First Come First Serve** approach is used in the app. My role in this project is **UI Developer** and worked on **React JS**. This project is developed on React Native for Mobile App, React JS for Admin Panel, PHP Laravel is used for server side and MySQL is used for backend.

AWARDS and ACHIEVEMENT

- Active participation in national social service(NSS).
- Active participation in the IT quiz events.
