PROFILE

As a self-taught MERN stack developer, I have gained proficiency in developing web applications using MongoDB, Express.js, React.js, and Node.js. With a strong passion for programming and problem-solving, I am constantly seeking new challenges to enhance my skills and knowledge.

EXPERIENCE

JUNIOR WEB DEVELOPER

Amrita Vishwa Vidyapeetham

- Creating web pages and user interfaces using HTML, CSS, and JavaScript
- Ensuring the website or application is mobile responsive
- Debugging and troubleshooting issues with the front-end code
- Collaborating with designers to ensure that the website meets the desired requirements and specifications.

PROJECTS

CONTACT LIST APPLICATION

This is a simple web application that allows users to create a list of contacts, view and edit their details, and delete them.

The application features:

- A user-friendly interface (React.js) that allows users to add contacts to the list, view their details, edit them, and delete them.
- A backend API (Node.js, Express.js) that stores contacts in a database (MongoDB) and provides endpoints for creating, reading, updating, and deleting contacts.

BLOG APPLICATION

Blog web application that allows users to create, publish, and manage blog posts. It typically includes features such as a user-friendly interface (React.js), a content management system (Strapi).
